

Digital Markets - Submissions

1. Will the Future of Work include Peer-to-Peer Workers?

Comments: "What is the role of contractors and is the peer-to-peer economy viable without them. Do employee reclassification laws harm small businesses and gig workers, and do they further entrench established platforms? How do we strike a balance?"

2. Licensing and taxing tech platforms to pay for news and journalism

3. Possible ways the democrat majority will regulate big tech

4. Do intermediary liability limits make digital markets more competitive?

5. Should social media platforms be regulated as "common carriers" and be forced to display all user posts?

6. Internet technologies (5G, AI) applied to the Performing Arts

7. AI and Corporate Social Responsibility, AI and Future of Work

Comments: AI development and use at corporations and its social responsibility.

8. Role of regulatory sandboxes in market creation and increasing competition

9. How would increased intermediary liability affect digital markets and consumers?

10. Licensing and taxing tech platforms to pay for news and journalism

11. The European Court of Justice Schrems II Decision, Privacy Shield negotiations, and defacto data localization

12. How well has the tech industry helped people stay connected, informed, educated, productive, and entertained during COVID?
